

# Data Science Course: Capstone Project 1

## Capstone Mini-Project: Data Wrangling

### Learning Objective

- Collect data.
- Clean the dataset and address issues like missing values and outliers.
- Apply data wrangling techniques, including standard datasets and sources.

Criteria	Meets Expectations
Completion	<ul style="list-style-type: none"><li><input type="checkbox"/> All data wrangling steps utilized are described</li><li><input type="checkbox"/> Data and code is uploaded to Github (where applicable)</li></ul>
Process and understanding	<ul style="list-style-type: none"><li><input type="checkbox"/> The submission shows that the student understands how to <b>acquire, wrangle</b> and <b>clean data</b></li><li><input type="checkbox"/> The submission includes data sets that were well-chosen and relevant to the problem</li><li><input type="checkbox"/> The submission demonstrates that the student made well-thought out decisions on how to work missing values and outliers as needed</li></ul>
Presentation	<ul style="list-style-type: none"><li><input type="checkbox"/> 1-2 page, commentable google doc. is added to the Capstone project 1 folder</li><li><input type="checkbox"/> The submission is complete and uploaded in full</li></ul>

*Excellence: The student collected data from multiple disparate sources (APIs, CSVs) and extracted the relevant data, enhancing the quality of the results.*

For reference, review how this interim project fits into the [Overall Capstone Project 1 Rubric](#).
